

= **Faucet/Hose Location**

\*There may not be a hose connected at all faucet locations.

= **Front Garden Gate**

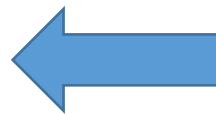

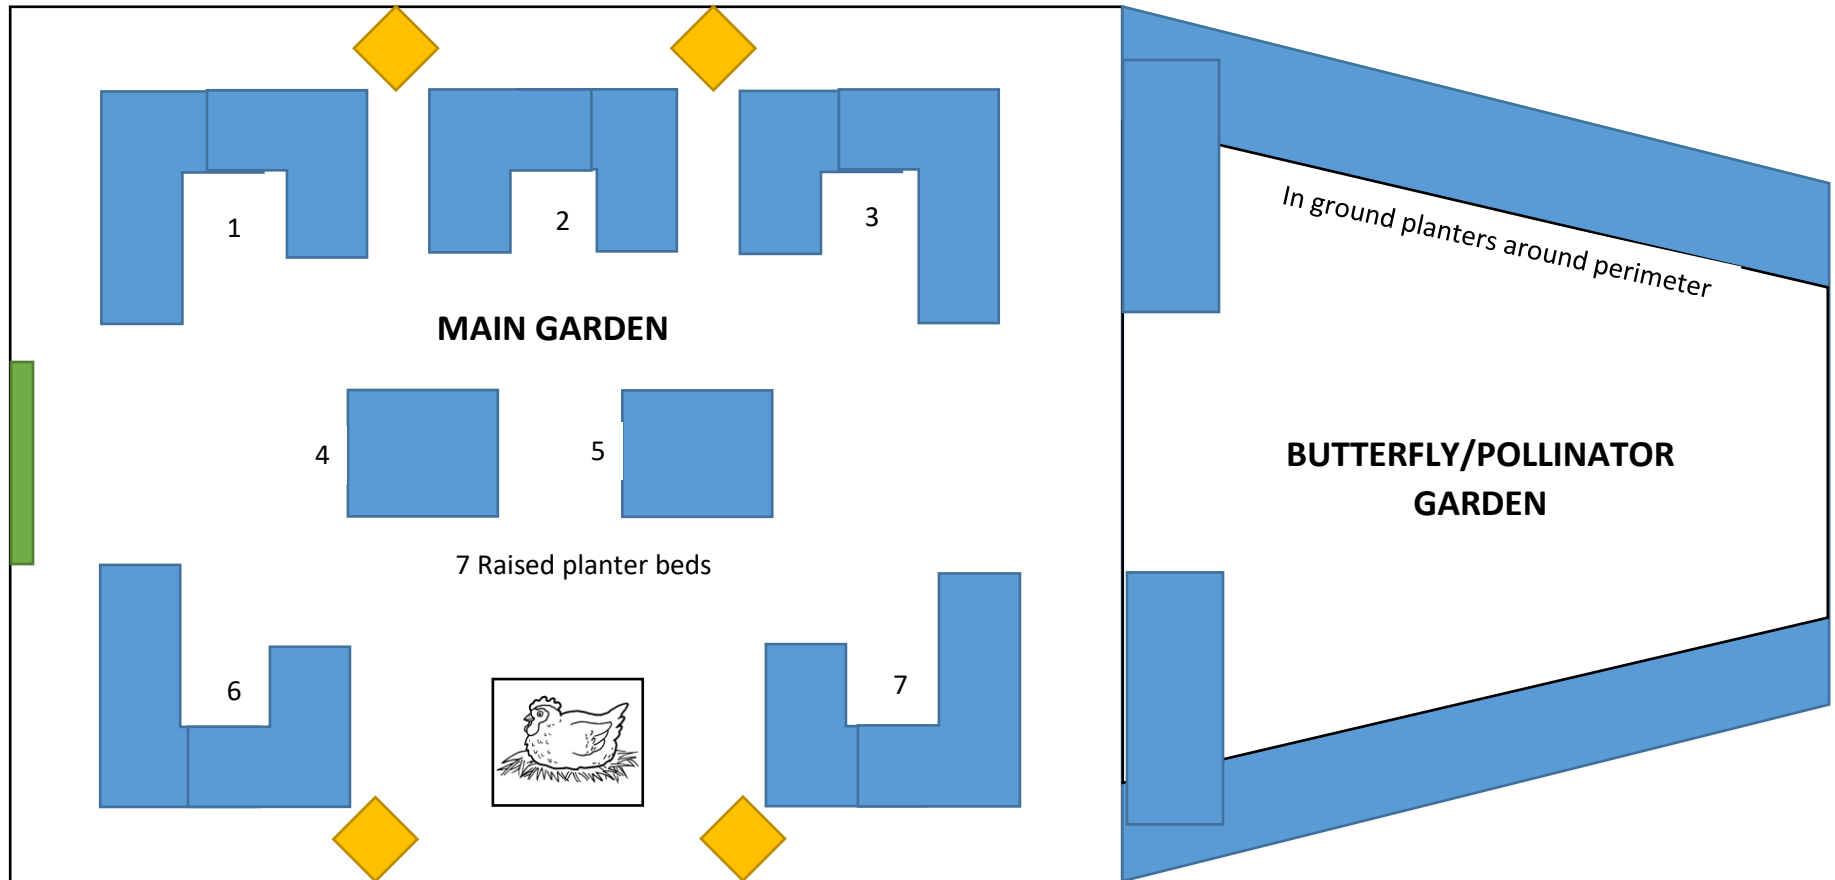

\*Use the code to unlock the green lock.

= **Areas that need to be watered**

\*Please water all raised beds, hanging and potted plants around the raised beds in Main garden. Please water all in-ground planters and potted plants in Butterfly/Pollinator garden area.

Please give all of the raised beds a good soak. Succulents do not require much water (water only once a week). Seedling trays on the racks and around the garden can use a light sprinkle.

We use a double lock method on the front gate and also on the gate to the storage area by the sink. Please be sure to wrap the chain around the post and bring the silver lock thru the chain link fence to the front. Please link the green lock thru the chain and connect the 2 locks together as shown. This allows volunteers to access the garden with the green lock and the school district to access the garden using the silver lock if necessary.
